## Industrial

The pairing of industrial and elegant is one that is not often combined, but that is what Hayworth precisely personifies! The simple yet trendy pull and knob collection offers a clean design while providing a substantial profile through its stepped detail. Hayworth shares the same profile with the Carmen Acrylic collection (see page 24-25).

## Comfortable

Merrick's simple strap design is anything but with its subtle curves, broad profile, and clean square feet. A comfortable choice for various cabinet styles, this pull family's versatility makes it a popular choice.

### *Design Idea*

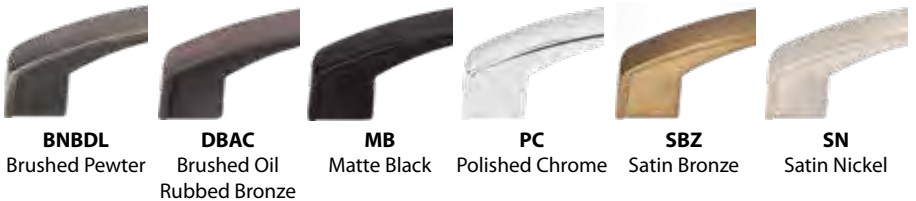

If you use two cabinet finishes, go with two distinctive cabinet knob or pull finishes of the same style to complement each cabinet color.

## Harmonic

Gibson, with its clean, casual lines, brings an effortless, harmonic vibe to your contemporary or transitional space. A coordinating smooth and simplistic 1-1/4" diameter cabinet knob pairs melodiously with its cabinet pull. The standard pull features soft outer curves and straight lines that flow into cylindrical feet producing an easy-going feel. This closed-end bar pull collection is a crowd-pleaser.

## Fun

Fun and lively, a soft square silhouette is echoed in Hadly's pull and knob. Flourishing quickly into a crowd favorite, extended lengths and finishes have been added to deepen its appeal.

### *Design Idea*

Black and gold accents add so much personality to a predominantly white space. Don't be afraid to pair matte black hardware with gold accents to add pizzazz to your kitchen or bathroom.

## Subtle

A subtle reflection of a warded lock key, Knox pairs leading lines and intentional curves for a simple yet distinctive look. This closed-ended bar pull series offers a generous 1" hand clearance for an aesthetically pleasing option for Aging in Place projects.

### *Design Idea*

When choosing hardware, think about how often your drawers or doors are used, as well as who the user is. Longer pulls and pulls with a larger hand clearance are easier to grab, especially for users with limited hand mobility.

# Cabinet Hardware Selection & Sizing Guide

Need some help choosing hardware for your cabinets?  
Although there are no formal rules for hardware selection, there are some guidelines you can follow that can help you select the hardware that best fits your style and budget.

## Knobs vs. Pulls

**Knobs** are smaller on the cabinets and are a suitable choice when you want to highlight the beauty of your cabinets or backsplash. They work best on cabinet doors.

**Pulls** are larger than knobs and can make a more significant statement than knobs alone. They also make opening doors/drawers easier and are available in multiple sizes to add variety and give your cabinets a more customized designer look.

You could opt for knobs on upper cabinets and pulls on lower cabinets...

...or choose all pulls for a streamlined, modern look

## Pull Sizes

Remember, there are no set rules, so choose the length that best compliments your cabinets and the level of functionality needed. **Pro Tip:** Selecting a cabinet pull that is at least  $\frac{1}{3}$  the length of the door and  $\frac{1}{3}$  to  $\frac{1}{2}$  the width of the drawer is always a safe choice.

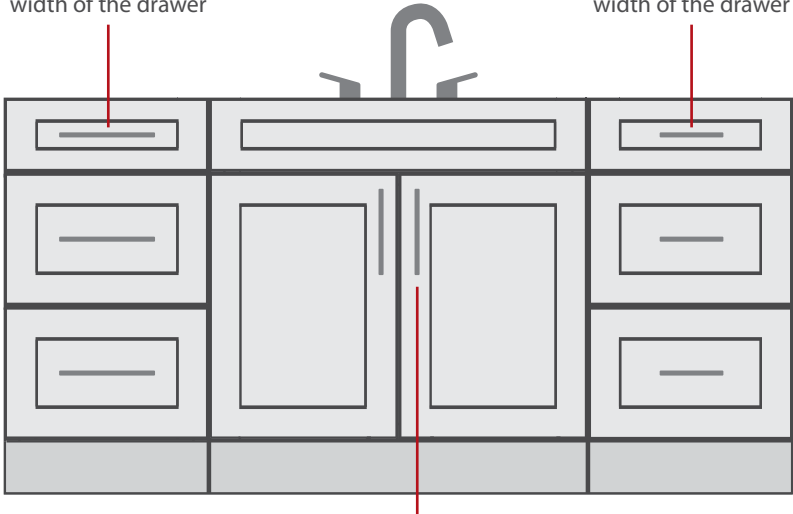

Choosing longer cabinet pulls makes it easier to grip and access your doors and drawers, increasing the functionality of your space while creating a clean and modern, high-end look.

Pull size is  $\frac{1}{2}$  the width of the drawer

OR...

Pull size is  $\frac{1}{3}$  the width of the drawer

Pull size is  $\frac{1}{3}$  the height of the door
